

Question Bank

CLASS: - VIII SEM

Subject: - Social Network (Elective -VI)

- 1 Explain Social Network in detail.
- 2 Explain the challenges in social network.
- 3 Define social Network analysis and its significance.
- 4 Discuss the challenges and technique in managing large scale network data.
- 5 Discuss the key concept and application of network analysis in real world scenario.
- 6 Explain Granovetter's strength of weak ties.
- 7 What is the social network dataset.
- 8 Explain Networkx in detail.
- 9 Explain marketing on social network.
- 8 Explain searching in network.
- 9 Explain validation of Granovetter's experiment using cell phone data.
- 10 Compare and contrast weak and strong relationship in social network.
- 11 Discuss the characteristic and impact of positive and negative relationship.
- 12 Define Homophily and discuss its role in social network.
- 13 Explain positive and negative relationship with respect to social network.
- 14 Explain community detection using Girvan Newman algorithm.
- 15 Describe about structural role.
- 16 Explain search the communities in a graph by using brute force method.
- 17 Define Power law and explain richer-get richer phenomenon.
- 18 Analyze the connection between power law and the spread of epidemics'
- 19 Give the example and implication of power laws in social network.
- 20 Discuss the algorithm used in linked analysis and their application.
- 21 Explain the basic of link analysis in context of social network.
- 22 Explain Fatman Evolutionary model the base code for adding a people.
- 23 Discuss Betweenness measures.
- 24 What are triddle closures. elobrate.
- 25 Explain Spatial Segregation.
- 26 Explain Schelling Model Implementation in detail.
- 27 Explain the fact Enemy's Enemy is a Friend.
- 28 Explain Balance theorem with respect to social network.
- 29 Explain fact equal coin distribution.
- 30 Explain how to find google page ranking using web graph.

- 31 Explain impact of communities on diffusion.
- 32 Explain small world phenomenon in social network.
- 33 Explain the concept going viral on the web.
- 34 Explain web graph in social network.
- 35 Explain foci closure and membership course.
- 36 Explain Dijkstra's algorithm.
- 37 What is synonymy network. Explain in detail.
- 38 Explain graph partitioning in detail.
